Owners/operators such as daycares can also contact other organizations in their field to get referrals to pla were found to be helpful and professional. Those looking for referrals could ask questions like: did the insp report on time? Did the inspector take photographs of any issues identified? Did he or she answer the clien the client to watch as the inspection took place? And finally, did the inspector help the client prioritize repai

What should I consider when hiring a playground safety inspector?
When contacting potential playground inspectors, be prepared to ask some questions to ensure that you are hirin knowledgeable professional to properly assess your playground. Here are some important points to consider:

- They should be able to provide proof of current Playground Safety Inspector Certification issued by a credi as the Canadian Parks and Recreation Association (CPRA) or Ontario Parks Association, Institut National Québec (INSPQ).
- They should have a solid, technical understanding of the most current CSA Standard for Children's Playsp
- They should be able to assess the risk of potential injury using the various surfacing performance testing d playground equipment testing instruments described in the CSA Standard.
- They should be able to provide a list of references.
- They should not be in a conflict of interest with any manufacturers, suppliers and/or other contractors that a equipment and surfacing in your playground.

What does a playground inspection cost?
The cost of a professional playground inspection will depend on many factors - including the size and age of play requirements from the playground operator's insurer, and the experience and credentials of the inspector. Inspect generally from around $250 to $600. A typical inspection might be $350 plus another $50 to $150 for surface impa time.

If you need surface impact testing by itself, you can expect a cost of approximately $250 to $300. The cost can be however, depending on how many "drop tests" you need and the availability of testers in your area. Be sure to as price is for the whole "surface system" or whether the price will apply separately to each piece of equipment the te dropped from.

Photos may increase the cost of your inspection report, but they can be very helpful in understanding your inspec communicate your needs to other contractors who may be doing repairs or renovations. Be sure to ask whether p your inspection report.

In some more remote areas, there could be a greater cost associated with hiring a playground inspector because distances for the inspector. One way to approach this challenge is for owners/operators of playgrounds pool their playground inspector inspect multiple playground sites on the same visit.
